
Analysis of Netflix TV shows and Movies

FOR EACH TITLE OF THE MOVIES/TV SHOWS THE DATA INCLUDES: TYPE (MOVIES/TV SHOWS), DIRECTOR, CAST, COUNTRY (WHERE MOVIES/TV SHOWS RELEASED), DATE ADDED, RELEASE YEAR, RATING, DURATION, LIST IN(CATEGORY) AND DESCRIPTION (OF THE MOVIES/TV SHOWS). THERE ARE A TOTAL OF 8797 MOVIES AND TV SHOWS IN THE DATA SET. AFTER EXTENSIVE ANALYSIS OF DATA SETS, SOME INTERESTING FINDINGS ARE DISCUSSED BELOW.

Top Country where the movie / Tv show is released

Netflix content is mainly divided into two categories: Movies and TV shows.

Netflix has tons of movies and tv shows are on their platform. From that collection, we can see that they have most of the movies in their collection almost 70 per cent.

Other than movies Netflix has also Tv Shows in their collection and that is nearly 30 per cent.

Netflix has uploaded lots of content from the day they started their streaming service till today.

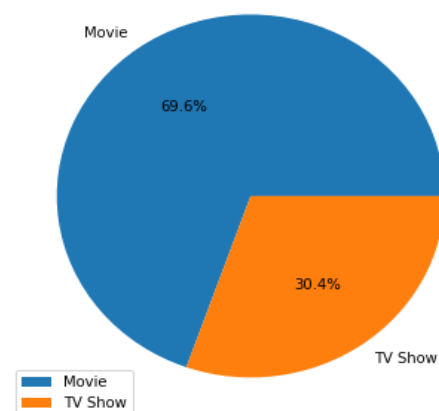

From that data, we can see that countries like the USA, India, United Kingdom, Japan, and South Korea were top of the list in the aspect of content released in respective countries.

As we can see the highest numbers of Movies and TV shows were released in the USA. More than 2500 movies and Tv Shows were released in the only USA.

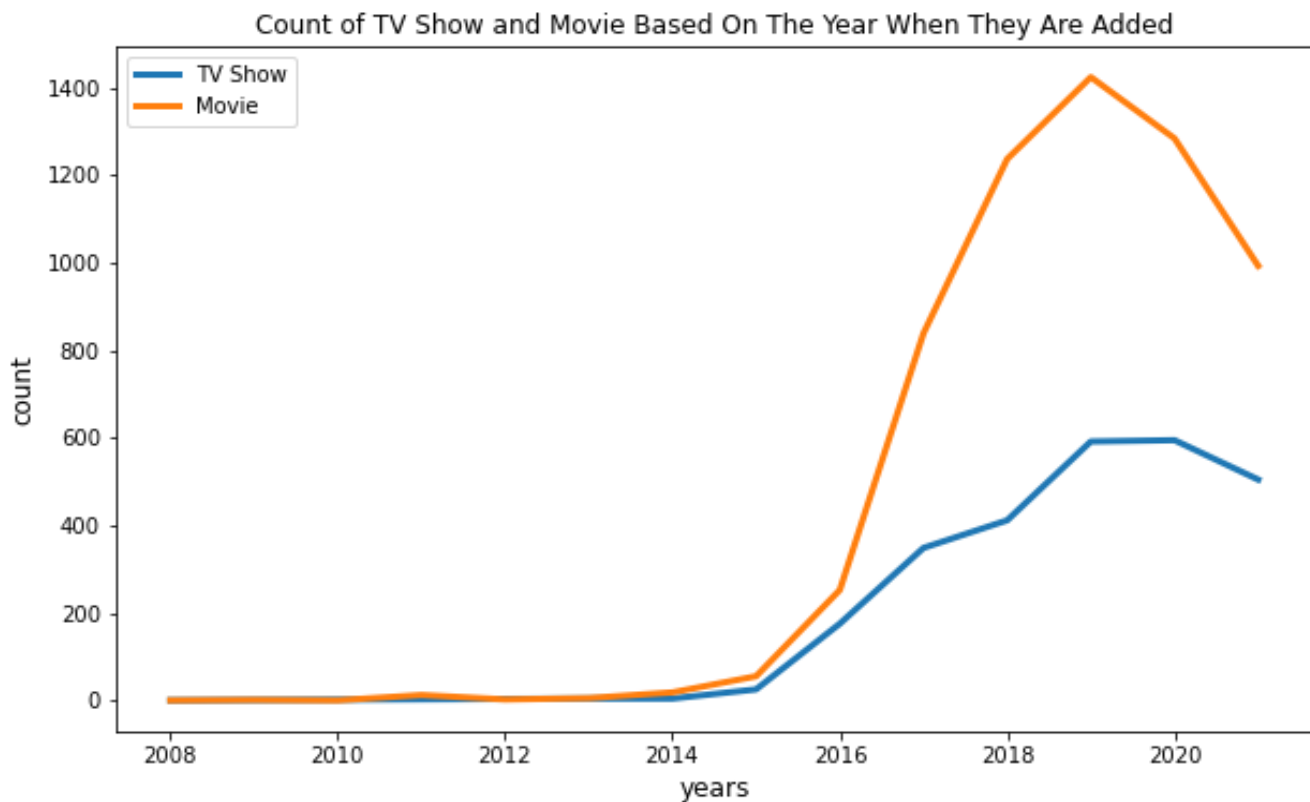

Count of other top countries like India, United Kingdom, Japan, and South Korea together cannot match of USA's count only.

The reason behind that is that Netflix is founded in the USA so initially Netflix is only available in the USA.

Does Netflix have more TV Shows or Movies?

As we see that imbalance in the aspect of the count. For reason behind that is: when Netflix has started its streaming services that time Tv Shows are not quite popular as nowadays popular so that time more movies are uploaded by Netflix. Moreover, movies are always popular all over the world.

when we look at the graph of the Netflix has added movies and tv shows on their online platform over the years we can see that at starting of their business they only added one or two Movie /Tv Shows till 2010.

After 2011 we can see a slow but steady increase in the count of uploaded Movies and Tv Shows till the year 2015. After 2015 we can see that count of movies and tv shows are drastically increased but when we see that graph of movies then it was quite a massive incline was seen in the period of 2015 to 2019.

At the same time, Tv Shows count also increases with time. But we can notice that in the year 2019-2020 graph of Movies and Tv Show were noticeable declined. That decline in the count was seen because of that time world has suffered from a pandemic situation(covid-19) every sector of the world was affected by covid-19 and Netflix also witnessed that.
